Subject: Re Lake Clear trailers

Dear Mayor Murphy and Municipal Councillors:

I am deeply concerned regarding the increase in the number of trailers on Lake Clear that are positioned close to the water's edge and have no specific system in place to remove raw sewage. In the past years we have become increasingly aware of how fragile our lake ecosystem has become and raw sewage leaching into our beautiful lake is simply going to destroy our piece of paradise for generations to come. We cannot be shortsighted and must take action immediately to protect our environment.

I have owned my personal family cottage and sleeping cabin for over 20 years. When my sleeping cabin on the lake needed to be replaced I followed very strict guidelines imposed by the county to ensure that my construction met current guidelines meeting environmental standards.

Also as owner of Sandy Beach Cottages for the past 13 years, I have only permitted the occasional usage of tents and RV's and only as an add on if the guests have rented a cottage to use for both washing and toilet facilities. I am very strict about this policy in spite of the fact that I could greatly increase my profits if I were more lenient.

We are the caretakers of our beautiful lake community and it is up to us to finally start imposing regulations on R.V. usage that ensures and safeguards our lake for future generations. Let us not continue to be short sighted as to the problematic nature of current R.V. usage on Lake Clear.

Sincerely,
Cynthia Prince
