Re: RVs on Lake Clear

I am sending this letter on behalf of the BRWP in support of concerns raised by the Lake Clear Property Owners Association (LCPOA) regarding RV's at the lake.

Lake Clear is currently recognized by OMNRF and in the RC official plan as an at-capacity lake for development. In our opinion, the LCPOA is justified in their concern that further development pressure from increasing numbers and utilization of RVs is problematic for protecting water quality and maintaining a 30m strip of shoreline as natural or undeveloped to conserve shoreline integrity, water quality and wildlife (both terrestrial and aquatic).

We look forward to the discussion with BVT council on this issue and its resolution.

Sincerely,

Kathryn Lindsay, PhD (Biology)
Chair and Program Volunteer
