**Re: Assessment of Past Uses
Infrastructure Upgrades Project
Eganville, Ontario**

Enclosed is GEMTEC Consulting Engineers and Scientists Limited's Assessment of Past Uses (APU) report as per our proposal dated February 13, 2026. The APU was completed in general accordance with Ontario Regulation (O.Reg.) 406/19 and describes the interpreted environmental conditions at the Project Area based on available information and observations at the time the APU was completed. This APU was carried out under the supervision of, and reviewed by, the undersigned Qualified Person, as defined per Section 5 of Ontario Regulation 153/04.

We trust this information is sufficient for your current needs. If you have any questions or require further information, please contact the undersigned.

Jeffrey Gauthier, B.Eng

EXECUTIVE SUMMARY

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by the Township of Bonnechere Valley to complete an Assessment of Past Uses (APU) to support the Infrastructure Upgrades Project in Eganville, Ontario (the 'Project Area'). The location of the Project Area is shown on Figure A.1, Appendix A.

The APU was conducted in general accordance with Ontario Regulation (O.Reg.) 406/19 and associated *Rules for Soil Management and Excess Soil Quality Standards* (the Soil Rules), dated 2025. The Project Area is considered an enhanced investigation property, as defined by O.Reg. 406/19.

The primary objective of this APU is to develop a preliminary determination of the likelihood of soil contamination in areas where excavation is to occur within the Project Area. This is achieved through the identification of potentially contaminating activities (PCAs) and the determination of the potential for these PCAs to have resulted in an area of potential environmental concern (APEC) within the Project Area. This objective was met through the evaluation of the information gathered from the review of records, interviews (where applicable), and a Site reconnaissance.

Based on the review of records, and the Site reconnaissance completed as part of the APU, GEMTEC identified PCAs for the APU Study Area resulting in APECs for the Project Area. These APECs include:

- APEC 1 – The Project Area is currently used as a municipal roadway. Fill of unknown origin is likely present across the portions of the Project Area developed as roadways. Contaminants of Potential Concern (COPCs) include metals, hydride forming metals (arsenic, antimony, selenium), Other Regulated Parameters ((ORPs) including Electrical Conductivity (EC), Sodium Adsorption Ratio (SAR), pH, Hot Water Soluble Boron (B-HWS), Hexavalent Chromium (CrVI), Mercury (Hg) and Cyanide (CN-)), Petroleum Hydrocarbons (PHCs), Benzene, Toluene, Ethylbenzene, and Xylene (BTEX), and Polycyclic Aromatic Hydrocarbons (PAHs).
- APEC 2 – Salt compounds have likely been applied across the developed portions of the Project Area for de-icing purposes during the winter. COPCs include EC and SAR.
- APEC 3 – Historic presence of the Canada Pacific Railway. COPCs include metals, PHCs, BTEX, PAHs, Volatile Organic Compounds (VOCs), Polychlorinated Biphenyls (PCBs).
- APEC 4 – Operation of a wastewater treatment facility. COPCs include sulphates, phosphate, nitrate, nitrite, metals.
- APEC 5 – Listed as operating with gasoline and diesel storage tanks. COPCs include PHCs and BTEX.
- APEC 6 – Listed as operating with fuel oil tanks. COPCs include PHCs and BTEX.

Based on the review of information collected during this APU, the Qualified Person concludes the following:

- There are six APECs within the Project Area that could result in the presence of contaminants in soil that is to be excavated within the Project Area.
- The Project Area land use is presently considered community. The first developed use of the Project Area is considered to be prior to 1896.
- Based on the identification of APECs, there is the likelihood that one or more contaminants have affected the soil that is to be excavated within the project Area; and
- The COPCs that will be the focus of the Sampling and Analysis Plan (SAP) include: metals, hydride-forming metals (arsenic, antimony, selenium), ORPs including EC, SAR, pH, B-HWS, CrVI, mercury and cyanide, PHCs, BTEX, PAHs, VOCs, sulphates, phosphate, nitrate, nitrite, and PCBs.

1.0 INTRODUCTION

GEMTEC Consulting Engineers and Scientists Limited (GEMTEC) was retained by the Township of Bonnechere Valley to complete an Assessment of Past Uses (APU) to support the infrastructure upgrades project in Eganville, Ontario (the 'Project Area'). The location of the Project Area is shown on Figure A.1, Appendix A.

The APU was conducted in general accordance with Ontario Regulation (O.Reg.) 406/19 and associated *Rules for Soil Management and Excess Soil Quality Standards* (the Soil Rules), dated 2025. The Project Area is considered an enhanced investigation property, as defined by O.Reg. 406/19.

1.1 Project Description

It is understood that the project will involve of the replacement or upgrades to the existing storm and sanitary sewers, and watermain along three street sections within Eganville, Ontario (John Street, Highway 41, and Queen Street). Based on the RFP documents, a placeholder of approximately 5,600 cubic metres (m³) of excess soil is estimated to be generated as a result of the project. It is noted that this volume is based on high level estimates and may not be representative of the volumes that will be generated. The depth of excavation is not confirmed at this stage of design. The project is not anticipated to result in a change of property use within the Project Area.

A summary of the project limits is provided below.

- John Street from Highway 41, going east (approximately 530 metres (m))
- Easement from John Street to Highway 41 (approximately 100 m)
- Highway 41 from Louise Street to Queen Street (approximately 140 m)
- Queen Street from Highway 41 to Melanie Street (approximately 235 m)

Information for the existing sewers and watermain are not available at this time. As part of this proposal, it will be assumed that the maximum invert depth of the services is 3 m below surface, except along about 100 m of Queen Street, west of Patrick Street, where the sewer is indicated to be at a depth of about 4.5 m.

1.2 Project Area Description

The Project Area consists of approximately 0.55 kilometres (km) of John Street, 0.38 km of Queen Street, and 0.1 km of undeveloped land. It is understood that the lands associated with the Project Area are owned by the Township of Bonnechere Valley. The UTM coordinates of the approximate centre of the Project Area are 45°53'69 N and 77°09'61 W.

It is understood that excavation and possible stockpiling activities will occur throughout the Project Area during construction. Details of these activities are unknown at this time and will be confirmed

upon completion of the detailed project design and based on the contractor’s approach to construction.

GEMTEC is not aware of any legal instruments that apply to soil management within the Project Area and is not aware of the filing of a Record of Site Condition (RSC) or the intent to file an RSC for the Project Area.

The location and approximate boundary of the Project Area is shown on Figure A.1, Appendix A.

1.3 Project Leader(s) and Qualified Person(s)

The following Project Leader and Qualified Person (QP) are involved with the project:

	Project Leader	Qualified Person
Person(s)	Annette Gilchrist	Daniel Elliot, P.Geo.
Mailing Address	Township of Bonnechere Valley P.O. Box 100, 49 Bonnechere Street Eganville, Ontario K0J 1T0	GEMTEC Consulting Engineers and Scientists Limited 32 Steacie Drive Ottawa, Ontario K2K 2T5
Email Address	annetteg@eganville.com	dan.elliott@gemtec.ca
Phone Number	613-628-3101 Ext. 222	613-857-4936
Type of License	Certified Municipal Officer Accredited Ontario Municipal Clerk	Registered Professional Geoscientist in the Province of Ontario

2.0 SCOPE OF INVESTIGATION

2.1 General Objectives

The primary objective of this APU is to develop a preliminary determination of the likelihood of soil contamination in areas where excavation is to occur within the Project Area. This is achieved through the identification of potentially contaminating activities (PCAs) and the determination of the potential for these PCAs to have resulted in an area of potential environmental concern (APEC) within the Project Area and associated excavation areas. This objective was met through the evaluation of the information gathered from the review of records, and a Site reconnaissance.

2.2 Records Review

The records review included obtaining and reviewing records that relate to the Project Area and the APU Study Area to identify current and past land uses and activities that may have impacted

the soil quality within the Project Area. The following available records were reviewed as part of the investigation:

- Previous Environmental Reports – Where provided, previous environmental reports relating to the Project Area and/or APU Study Area were reviewed for information relevant to this APU;
- Bedrock and Overburden Geology Maps – Overburden and bedrock geology maps provided by Natural Resources Canada were reviewed to identify the underlying soil deposits and bedrock types in the APU Study Area;
- Fire Insurance Maps and Reports – Verisk was contacted and requested to search for fire insurance records. Relevant records, where available, were obtained for the Project Area and APU Study Area;
- Technical Standards and Safety Authority (TSSA) - Records request relating to fuel storage tanks;
- City Directories – A City Directory Report was requested from ERIS for properties within the Study Area surrounding the Site within a 100 m radius
- ERIS Databases – The Environmental Risk Information Services (ERIS) report searches public and private environmental databases for relevant records. An ERIS report was obtained for the Project Area and APU Study Area; and
- Aerial Photographs - Aerial photographs for various years were obtained from ERIS and reviewed on-line, where available. Aerial photos were reviewed for the Project Area and APU Study Area to identify areas of potential environmental concern based on land usage.

Given the use of the Project Area as a municipal roadway, the following records were not obtained as they are considered unlikely to provide any further relevant information: property ownership via a title search, and a Freedom of Information (FOI) request via the Ontario Ministry of the Environment, Conservation and Parks (MECP). The absence of this information is not considered to result in a data gap.

2.3 Interview

An interview was not completed as part of the APU as the Project Area is developed as a roadway and is owned by a municipality. It was considered unlikely that a municipal representative would be familiar with the current and historical uses of the Project Area and would contribute additional relevant information not obtained via other sources. The absence of this information is not considered to result in a data gap.

2.4 Site Reconnaissance

The Site reconnaissance was conducted to document current conditions and visually identify PCAs that may result in an APEC associated with the Project Area.

To meet the specific Site reconnaissance objectives outlined above, the Project Area was visually assessed to document current conditions and evaluate the potential for environmental impacts to soil. The Project Area was also inspected to identify if possible preferential pathways, such as underground utilities, exist within the Project Area that may affect the fate, transport, and distribution of contaminants within the subsurface. Adjacent properties were assessed from the Project Area and publicly accessible lands to evaluate the potential for environmental impacts in the Project Area.

3.0 RECORDS REVIEW

3.1 General

3.1.1 APU Study Area Determination

For the purpose of this APU, the APU Study Area is the area within a 250 m radius of the boundary of the Project Area. Based on GEMTEC’s review of the historical and current information compiled as part of this APU, as well as observations of neighbouring properties made during the Site reconnaissance, it was concluded that an assessment of information pertaining to properties within 250 m of the boundary of the Project Area was sufficient to achieve the objectives of the APU.

The location and limits of the Project Area and APU Study Area are provided on Figure A.1, Appendix A.

3.1.2 First Developed Use Determination

Based on the review of historical records obtained as part of this assessment, the Project Area has been used partially as a municipal roadway, with the northern portion along John Street used as a railway, since at least 1896. No records were available for prior to 1896. Based on this, the first developed use of the Project Area was likely prior to 1896.

3.1.3 Fire Insurance Records

Fire Insurance Plans (FIPs) are available from the OPTA database and were reviewed for 1896 and 1902. All ordered FIPs are provided in Appendix C.

Date	Sheet #	Address	PCA	PCA Description
1896	2, 4	On-Site	46	Canadian Pacific Railway
1902	2, 4	On-Site	46	Canadian Pacific Railway

Based on the above, the following PCAs were identified:

- # 46. Rail Yards, Tracks and Spurs – Canadian Pacific Railway present along John Street.

3.1.4 Chain of Title

A Chain of Title was not completed as part of the APU as the Project Area is a municipal roadway.

3.1.5 City Directories

A review of the city directories from 1998 to 2023 was completed for the Project Area and the surrounding properties. A summary of relevant information based on a review of the city directory information is provided in the table below. A copy of the city directory records is provided in Appendix C.

Civic Address	City Directory information
2824 Fourth Chute Road	Bonnechere Valley Windows LTD – Doors-Metal-Manufacturers/Glass-Auto Olate & Window (2012 - 2023)
150 John Street	Eganville Leader Publishing – Newspapers (Publishers/Manufacturers) (2012 - 2023)
148 John Street	3-D Graphics/Totally Auto – Sign Manufacturing (2012 - 2017)

Based on the above, the following PCAs were identified:

- #31. Ink Manufacturing, Processing and Bulk Storage – Possible bulk storage of ink at 148 and 150 John Street.

3.1.6 Previous Environmental Reports

No previous environmental reports were available for review.

3.2 Environmental Source Information

3.2.1 ERIS Database Report

GEMTEC contacted ERIS to conduct a search of public and private information databases for the Project Area and APU Study Area. The complete ERIS report, including a list of the databases searched, is provided in Appendix D. All listings in the ERIS report were reviewed and those of note are summarized below:

Address / Location	Distance from Project Area	Company / Name	Description
150 John Street	Directly south	The Eganville Leader	Listed on Scott's manufacturing list for quick printing, digital printing, other printing, and newspaper publishers from 1972 to 2002. Listed as a waste generator (ON1707700) during the years 1993 to 2004 for photo processing wastes.
148 John Street	Directly south	Frank Tracey Holdings Limited	Listed on Scott's manufacturing list for commercial printing (lithographic), commercial printing (not elsewhere classified), signs and advertising specialties, other printing, sign manufacturing in 1969.
233A Bridge Street	Directly south	Newlife Systems Corporation	Listed on Scott's manufacturing list for computer and peripheral equipment manufacturing in 1993.
176 Queen Street	80 m west	Jack's Garage	Listed as operating with a 25,000 Litre (L) gasoline and an 15,000 L diesel storage tanks installed in 1990. Listed as a waste generator (ON8069414) during the years 2013 to 2022 for one or more of the following: waste oils & lubricants, oil skimming's & sludges. 50 L spill of petroleum-based oil to road in 2015.
236 Queen Street	80 m south	Canadian Woodwork	Listed on Scott's manufacturing list for cabinet maker, kitchen remodeler in 2005.
78 Wellington Street	80 m south	St. James the Less Parish	Listed as operating with a 15,000 L fuel oil storage tank installed in 1995.
160 Wellington Street	110 m west	Bonnechere Valley Ontario	Furnace oil leak of unknown quantity to basement.
61 James Street	130 m west	N/A	900 L furnace oil leak to basement and septic system in 1990.
110 Bonnechere Street	160 m north	Ault Foods Ltd.	Listed as operating as a self serve fuel outlet with a 9,092 L, 13,638 L diesel USTs.

Address / Location	Distance from Project Area	Company / Name	Description
Intersection of Mill Street and John Street	175 m east	N/A	Spill of transformer oil to ground in 1989.
34254 Highway 41	235 m south	O'Grady Brothers Limited	Listed as operating as a gasoline station with a 13,638 L, 22,730 L gasoline underground storage tanks (USTs) installed in 1990.

Based on the above, the following PCAs were identified:

- #28. Gasoline and Associated Products Storage in Fixed Tanks – The ERIS report listed multiple fuel storage tank at 176 Queen Street, 61 James Street, 110 Bonnechere Street, and 34254 Highway 41.
- #31. Ink Manufacturing, Processing and Bulk Storage – Possible bulk storage of ink at 148 and 150 John Street.
- OT.1. Listed on Scott's manufacturing list – The ERIS report listed multiple Scott's manufacturing list at 150 John Street, and 176 Queen Street.
- OT.2. Listed as a waste generator – The ERIS report listed waste generators at 148, 150 John Street, 233A Bridge Street, and 236 Queen Street.
- OT.3. Listed as a spill – The ERIS report listed multiple spills located at 176 Queen Street, 160 Wellington Street, 61 James Street, and at the intersection of Mill Street and John Street.

The unplottable report summary was reviewed to determine if any of the records were located on the Project Area or within the APU Study Area. Some of the entries were only located geographically by concession, lot number, or company. Due to the uncertainty related to the location of the entries, which in most cases could not be confirmed as being present within the APU Study Area, these activities were not summarized in this report.

3.2.2 Technical Safety and Standards Authority

The TSSA was contacted for available records for properties located at 131, 148, 150, 165 John Street, 176 Queen Street, 78 Wellington Street, 49,110 Bonnechere Street and 34254 Highway 41. The response, dated February 23, 2026, indicated records for the following:

- 176 Queen Street
 - o Three FS liquid fuel tanks, FS propane tank, FS gasoline station – self serve, FS propane refill center – cylinder fill
- 78 Wellington Street

- o One FS fuel oil tank (active)
- 110 Bonnechere Street
 - o Two FS liquid fuel tanks and FS private fuel outlet – self serve
- 34254 Highway 41
 - o Two liquid fuel tank and FS gasoline station – self serve

A copy of the search requests and the response from the TSSA are provided in Appendix E.

Based on the TSSA response, the following PCAs were identified:

- #28. Gasoline and Associated Products Storage in Fixed Tanks – Liquid fuel tanks located at 176 Queen Street, 78 Wellington Street, 110 Bonnechere Street, and (34254 Highway 41).

3.2.3 Ontario Ministry of Environment, Conservation and Parks

A Freedom of Information (FOI) request was not completed as part of the APU as the Project Area is a municipal roadway and no properties of specific concern were identified.

3.3 Physical Setting Sources

3.3.1 Aerial Photographs

Aerial photographs were provided to GEMTEC by ERIS and were obtained from the National Air Photo Library (NAPL). Aerials were also reviewed from on-line sources. Aerials were selected for review considering suitable scale for analysis and coverage area. The earliest photograph obtained was from 1932. A copy of the aerial photographs provided by ERIS is attached in Appendix F.

Observations made with respect to the reviewed aerial photographs are summarized in the table below:

Date	Source	Observations
1932	NAPL	<ul style="list-style-type: none"> • The Project Area appears to be occupied by a road in similar position as present-day John Street and Queen Street. The central portion of the Project Area appears to be vacant/undeveloped. • The APU Study Area appears to be mostly residential and possibly commercial structures.
1969	NAPL	<ul style="list-style-type: none"> • No significant changes to the Project Area from the previous aerial photograph. • Residential development is present west of the Project Area.

Date	Source	Observations
1987	NAPL	<ul style="list-style-type: none"> No significant changes to the Project Area from the previous aerial photograph. Structures are present east and west of the Project Area.
1993	NAPL	<ul style="list-style-type: none"> No significant changes to the Project Area from the previous aerial photograph. Structures are present north of the Project Area. A possible pump island is present south at 34254 Highway 41.
2008	GON	<ul style="list-style-type: none"> No significant changes to the Project Area from the previous aerial photograph. A ground disturbance is present east of the Project Area. A wastewater treatment facility appears present at 131 John Street.
2013	Google Earth	<ul style="list-style-type: none"> No significant changes to the Project Area and APU Study Area from the previous aerial photograph.
2024	Google Earth	<ul style="list-style-type: none"> No significant changes to the Project Area and APU Study Area from the previous aerial photograph.

Based on the above, the following PCAs were identified:

- #28: Gasoline and Associated Products Storage in Fixed Tanks – Pump island located at 34254 Highway 41.
- #30: Importation of Fill Material of Unknown Quality – Fill material of unknown quality was likely brought to Project Area during the construction of John Street and Queen Street.
- #56: Treatment of Sewage equal to or greater than 10,000 litres per day – Wastewater treatment facility located north at 131 John Street.
- OT.4: Application of De-icing Salt – Salt compounds were likely applied across the Project Area for de-icing purposes in the winter.

3.3.2 Topography, Hydrology and Geology

Topic	Description	Comment / Source
Topography of Project Area and Surrounding Area	The elevation of the Project Area is approximately 158 to 174 metres (m) above sea level (asl) with a sloping topography north	Google Earth

Topic	Description	Comment / Source
	towards the Bonnechere River located north of the Project Area.	
Overburden Soils	Till consisting of stone-poor, sandy silt to silty sand-textured till on Paleozoic terrain.	Ontario Geologic Survey
Type of Bedrock	Limestone, dolostone, shale, arkose, sandstone from the Ottawa Group, Simcoe Group, Shadow Lake Formation.	Ontario Geologic Survey
Depth to Bedrock	Approximately 0 to 11.88 m below ground surface (bgs)	Ontario Geologic Survey
Inferred Near Surface Groundwater Flow	Based on the topography and hydrogeological features in the vicinity of the Project Area, it is anticipated that local shallow groundwater flow would be north towards the Bonnechere River. Regional groundwater is anticipated flow north towards the Bonnechere River.	ERIS report Ontario Geologic Survey Groundwater database
Project Area Grade Relative to the Adjoining Properties	Based on topographic mapping, the Project Area appears to follow the topography of the area and is generally sloping downwards to the north towards the Bonnechere River.	ERIS report
Depth to Groundwater	0.9 to 9.1 m bgs	MECP Water Well Records

3.3.3 Fill Materials

Topic	Description	Comment / Source
Fill Materials	There is the potential for fill material to be present in association with the construction of the roadways located within the Project Area and APU Study Area.	ERIS report, aerial photographs

3.3.4 Water Bodies, Areas of Natural Significance and Groundwater Information

Topic	Description	Comment / Source
Nearest Open Water Body	Bonnechere River is present directly north of the Project Area.	Ontario Base Map
Areas of Natural and Scientific Interest (“ANSI”)	None observed.	Ministry of Natural Resources
Provincially Significant Wetlands	None observed.	Ministry of Natural Resources

3.3.5 Well Records

Topic	Description	Comment / Source
Wells (location, stratigraphy of the overburden, from ground surface to bedrock, depth to bedrock, depth to water table)	26 wells were identified within the Project Area and APU Study Area and were listed as domestic, abandoned, and/or monitoring. The overburden material in the area included gravel, sand, hardpan, and clay. Bedrock was encountered at approximately 0.0 to 11.8 m bgs. The depths of the wells ranged from 27.4 to 62.1 m bgs and water was found at 0.9 to 9.1 m bgs.	ERIS report

4.0 INTERVIEW

An interview was not completed as part the APU as the Project Area is a municipal roadway.

5.0 SITE RECONNAISSANCE

5.1 General Site Conditions

The Site reconnaissance was completed by Jeffrey Gauthier, B.Eng., of GEMTEC on February 19, 2026, from 11:40 am to 12:40 pm. The APU Study Area was assessed in a systematic manner by walking the project extents and recording visual and olfactory observations. The weather at the time of the Site reconnaissance was sunny, and the air temperature was approximately -5°C.

At the time of the Site reconnaissance, the Project Area consisted of asphalt paved roadways and a vacant undeveloped, vegetated strip of land. Snow cover was present on vegetated strip. Hydro poles with overhead wires were present along the Site. The surrounding area was largely used for commercial properties, industrial properties, and residential properties. A wastewater treatment facility was located at 131 John Street, directly north of the Project Area.

Photographs of the Project Area were taken during the course of the Site reconnaissance to document the general condition of the Project Area. Selected relevant photographs are presented in Appendix G.

5.2 Specific Observations at the Project Area

The following observations were made relating to the Project Area during the Site reconnaissance:

Topic	Observations	Source
Number and Age of Buildings on the Project Area	None observed.	Site observations
Number and Details of all Aboveground Storage Tanks (ASTs)	None observed.	Site observations
Number and Details of all Underground Storage Tanks (USTs)	None observed.	Site observations
Underground Utilities	The Project Area is generally serviced with municipal water, storm, and sewers, natural gas, and hydro along John Street and Queen Street.	Site observations

Topic	Observations	Source
Ground Cover (i.e., grass, gravel, soil, or pavement, etc.)	The Project Area consisted of asphalt paved roadways and a vegetated strip. Snow cover was present on the vegetated strip.	Site observations
Current or Former Railway Lines or Spurs	None observed.	Site observations
Presence of Stained Soil, Vegetation, or Pavement	None observed.	Site observations
Presence of Stressed Vegetation	None observed.	Site observations
Unidentified Substances	None observed.	Site observations
Areas Where Fill and/or Debris Materials Appear to Have Been Placed	There is the potential for fill material to be present in association with the construction of the roadways located within the Project Area.	Site observations
Application of De-icing Salt	Salt compounds have likely been used on the roadways within the Project Area for de-icing purposes during the winter.	Site observations
Potentially Contaminating Activity	<p>At the time of the Site reconnaissance, the following PCAs were noted in association with the Project Area:</p> <ul style="list-style-type: none"> • 30. Importation of Fill Material of Unknown Quality: Potential for fill to be used for roadway construction. • 56. Treatment of Sewage equal to or greater than 10,000 litres per day: A wastewater treatment facility located at 131 John Street. • OT.4. Application of De-Icing Salt: Salt compounds have likely been used on the roadways within the Project Area for de-icing purposes during the winter. 	Site observations

5.3 Enhanced Investigation Property

Based on the information reviewed as part of this APU, the Project Area is considered an enhanced investigation property, as defined by O.Reg. 406/19. All or a portion of the Project Area

has been historically used for industrial purposes, as the Canadian Pacific Railway and current wastewater treatment plant. The Project Area is currently used for community purposes

Topic	Observations	Source
Operations at the property, including processing or manufacturing	The northern portion of the Project Area (John Street) was used as railway in at least 1902. It is currently a municipal roadway.	Site observation
Hazardous materials used or stored at the Phase One property	None observed or reported.	Site observation
Products manufactured at the Phase One property	None observed or reported.	Site observation
By-products and wastes at the Phase One property	None observed or reported.	Site observation
Raw materials handling and storage locations at the Phase One property	None observed or reported.	Site observation
Location and contents of drums, totes and bins at the Phase One property	None observed or reported.	Site observation
The location, installation date, source of incoming liquid and effluent discharge location for all oil-water separators	None observed or reported.	Site observation

Topic	Observations	Source
All vehicle and equipment maintenance areas, including the locations of maintenance, fluid storage, and waste storage areas	None observed or reported.	Site observation
Details of all spills including the dates, locations, materials involved, and volumes of material spilled	None observed or reported.	Site observation
Details of liquid discharge points such as water and French drains, including their locations	None observed or reported.	Site observations
Details of all hydraulic lift equipment at the property, including elevators, in-ground hoists and loading docks	None observed or reported.	Site observations

5.4 Adjacent Lands

Adjacent properties were viewed from the Project Area and publicly accessible boundaries to assess the potential for current land uses in the vicinity to adversely impact the Project Area. The following adjacent properties were observed:

North: Commercial, industrial, and residential land use.

South: Commercial, industrial, and residential land use.

East: Commercial and residential land use.

West: Commercial and residential land use.

5.5 Site Reconnaissance Limitations

Snow cover limited visual observations during the Site reconnaissance.

6.0 REVIEW AND EVALUATION OF INFORMATION

6.1 Current and Past Uses

Current and past uses of the Project Area since the date of first developed use are summarized in the table below:

Year	Property Use	Description of Property Use	Other Observations from Aerial Photographs, Fire Insurance Plans, etc.
1896 to 1933	Industrial/Community	Canadian Pacific Railway and community roadway	No aerial photographs or fire insurance plans were available for prior to 1896. Based on available fire insurance plans, portions of John Street were developed as a railway and Queen Street as a roadway prior to 1896.
1933 to Present	Community	Community roadway	Based on available aerial photos and fire insurance plans, the majority of the Project Area developed as a roadway between 1902 and 1933. The remainder is a vegetated strip.

6.2 Potentially Contaminating Activities

A summary of the PCAs identified within the Project Area and APU Study Area is provided in the following table. The PCA locations are shown on Figure A.2, Appendix A.

PCA Reference # on Figure A.2	Address/Location of PCA	PCA ID	Distance From Project Area	Description	PCA Resulted in APEC Rational
30-1	Across the Project Area	#30. Importation of Fill Material of Unknown Quality	On-Site	The Project Area is currently used as a municipal roadway. Fill of unknown origin is likely present across the portions of the Project Area developed as roadways.	Yes – APEC 1 Based on potential for fill material being present within the Project Area.
OT.4-1	Across the Project Area	OT. 4. Application of De-icing Salt	On-Site	Salt compounds have likely been used on the roadways within the Project Area for de-icing purposes during the winter.	Yes – APEC 2 Based on the PCA being located within the Project Area.
46-1	John Street	#46. Rail Yards, Tracks and Spurs	On-Site	Historic presence of the Canada Pacific Railway.	Yes – APEC 3 Based on the PCA being located within the Project Area.

PCA Reference # on Figure A.2	Address/Location of PCA	PCA ID	Distance From Project Area	Description	PCA Resulted in APEC Rational
31-1 OT.1-1 OT.2-1	150 John Street	OT.1. Listed on Scott's manufacturing list OT.2. Listed as a waste generator	Directly south	Listed on Scott's manufacturing list for quick printing, digital printing, other printing, and newspaper publishers from 1972 to 2002. Listed as a waste generator (ON1707700) during the years 1993 to 2004 for photo processing wastes.	No Based on the scale and nature of operations.
31-2 OT.1-2	148 John Street	OT.1. Listed on Scott's manufacturing list	Directly south	Listed on Scott's manufacturing list for commercial printing (lithographic), commercial printing (not elsewhere classified), signs and advertising specialties, other printing, sign manufacturing in 1969.	No Based on the scale of operations.
OT.1-3	233A Bridge Street	OT.1. Listed on Scott's manufacturing list	Directly south	Listed on Scott's manufacturing list for computer and peripheral equipment manufacturing in 1993.	No Based on the scale of operations.

PCA Reference # on Figure A.2	Address/Location of PCA	PCA ID	Distance From Project Area	Description	PCA Resulted in APEC Rational
56-1	131 John Street	# 56. Treatment of Sewage equal to or greater than 10,000 litres per day	Directly north	Operation of a wastewater treatment facility.	Yes – APEC 4 Based on the proximity of the PCA to the Project Area.
28-1 OT.2-2 OT.3-1	176 Queen Street	#28. Gasoline and Associated Products Storage in Fixed Tanks OT.2. Listed as a waste generator OT.3. Listed as a spill	80 m west	Listed as operating with a 25,000 Litre (L) gasoline and an 15,000 L diesel storage tanks installed in 1990. Listed as a waste generator (ON8069414) during the years 2013 to 2022 for one or more of the following: waste oils & lubricants, oil skimmings & sludges. 50 L spill of petroleum-based oil to road in 2015.	Yes – APEC 5 Based on the proximity of the PCA to the Project Area.
OT.1-4	236 Queen Street	OT.1. Listed on Scott's manufacturing list	80 m south	Listed on Scott's manufacturing list for cabinet maker, kitchen remodeler in 2005.	No Based on the scale and nature of operations.
28-2	78 Wellington Street	#28. Gasoline and Associated Products Storage in Fixed Tanks	80 m south	Listed as operating with a 15,000 L fuel oil storage tank installed in 1995.	Yes – APEC 6 Based on the proximity of the PCA to the Project Area.

PCA Reference # on Figure A.2	Address/Location of PCA	PCA ID	Distance From Project Area	Description	PCA Resulted in APEC Rational
28-3 OT.3-2	160 Wellington Street	#28. Gasoline and Associated Products Storage in Fixed Tanks OT.3. Listed as a spill	110 m west	Furnace oil leak of unknown quantity to basement.	No Based on distance from the Project Area.
28-4 OT.3-3	61 James Street	#28. Gasoline and Associated Products Storage in Fixed Tanks OT.3. Listed as a spill	130 m west	900 L furnace oil leak to basement and septic system in 1990.	No Based on distance from the Project Area.
28-5	110 Bonnechere Street	#28. Gasoline and Associated Products Storage in Fixed Tanks	160 m north	Listed as operating as a self serve fuel outlet with a 9,092 L gasoline and, 13,638 L diesel USTs.	No Based on distance from Project Area and intercepting waterbody.
OT.3-3	Intersection of Mill Street and John Street	OT.3. Listed as a spill	175 m east	Spill of transformer oil to ground in 1989.	No Based on distance from Project Area.
28-6	34254 Highway 41	#28. Gasoline and Associated Products Storage in Fixed Tanks	235 m south	Listed as operating as a gasoline station with a 13,638 L, and 22,730 L gasoline USTs installed in 1990.	No Based on distance from the Project Area.

6.3 Areas of Potential Environmental Concern

A summary of the APECs identified in association with the Project Area is provided in the following table. The APEC locations are shown on Figure A.3, Appendix A. Contaminants of potential concern (COPCs) are specified using the method groups as identified in the MECP document "*Protocol for in the Assessment of Properties under Part XV.1 of the Environmental Protection Act and Excess Soil Quality*", dated February 19, 2021.

APEC	PCA Identifier	Description	Area of the APEC	COPCs
1	#30	The Project Area is currently used as a municipal roadway. Fill of unknown origin is likely present across the portions of the Project Area developed as roadways.	Across the developed portions of the Project Area	Metals, Hydride Forming Metals, ORPs, PHCs, BTEX, PAHs
2	OT.4	Salt compounds have likely been used on the roadways within the Project Area for de-icing purposes during the winter.	Across the developed portions of the Project Area	EC, SAR
3	#46	Historic presence of the Canada Pacific Railway	Along John Street	Metals, PHCs, BTEX, PAHs, VOCs, PCBs
4	#56	Operation of a wastewater treatment facility	Across northeastern portion of the Project Area	Sulphates, phosphate, nitrate, nitrite, metals
5	#28	Listed as operating with gasoline and diesel storage tanks.	Western portion of the Project Area	PHCs, BTEX
6	#28	Listed as operating with fuel oil tanks.	Southern portion of the Project Area	PHCs, BTEX

Notes: Metals: Metals parameters as per O.Reg. 153/04
Hydride forming metals: antimony, arsenic, selenium)
ORP: Other Regulated Parameters including electrical conductivity (EC), sodium adsorption ratio (SAR), low or high pH, hot water-soluble boron (B-HWS), hexavalent chromium (CrVI), mercury (Hg) and cyanide (CN-)
EC: Electric Conductivity
SAR: Sodium Adsorption Ratio

PHCs: Petroleum Hydrocarbons Fractions F1 to F4
BTEX: Benzene, Toluene, Ethylbenzene, and Xylenes
PAHs: Polycyclic Aromatic Hydrocarbons
VOCs: Volatile Organic Compounds
PCBs: Polychlorinated Biphenyls

6.4 Assessment of Past Uses Conceptual Site Model

The Conceptual Site Model (CSM) for the Project Area is summarized below and on Figures A.1 to A.3, Appendix A.

- The Project Area is currently a municipal right of way developed with roads (i.e., portions of John Street and Queen Street) and a vegetated strip of land. Based on available aerial photos and fire insurance plans, portions of John Street was developed as a railway prior to 1896, and Queen Street was developed as a roadway. Current and former land uses adjacent to the Project Area included commercial, institutional, industrial, and residential. The first developed use of the Project Area is considered to be prior to 1896.
- The Project Area is generally serviced with public utilities including hydro, municipal water, storm, and sewers along John Street and Queen Street. Based on the findings of this APU, it is unlikely that underground utilities within the Project Area have affected the distribution and transport of contaminants, if any.
- Twenty-six wells were identified within the Project Area and APU Study Area and were listed as domestic, abandoned, and/or monitoring.
- The surficial soil conditions are primarily characterized by till consisting of stone-poor, sandy silt to silty sand-textured till. Bedrock geology is mapped as Limestone, dolostone, shale, arkose, sandstone from the Ottawa Group, Simcoe Group, Shadow Lake Formation.
- Based on the topography and hydrogeological features in the vicinity of the Project Area, it is anticipated that local shallow groundwater flow north towards the Bonnechere River. Regional groundwater is anticipated flow north towards the Bonnechere River
- Based on the review of records, and the Site reconnaissance completed as part of the APU, GEMTEC identified PCAs for the APU Study Area resulting in APECs for the Project Area. These APECs include:
 - o APEC 1 – The Project Area is currently used as a municipal roadway. Fill of unknown origin is likely present across the portions of the Project Area developed as roadways. Contaminants of Potential Concern (COPCs) include metals, hydride forming metals (arsenic, antimony, selenium), Other Regulated Parameters ((ORPs) including Electrical Conductivity (EC), Sodium Adsorption Ratio (SAR), pH, Hot Water Soluble Boron (B-HWS), Hexavalent Chromium (CrVI), Mercury (Hg) and Cyanide (CN-)), Petroleum Hydrocarbons (PHCs), Benzene, Toluene, Ethylbenzene, and Xylene (BTEX), and Polycyclic Aromatic Hydrocarbons (PAHs).
 - o APEC 2 – Salt compounds have likely been applied across the developed portions of the Project Area for de-icing purposes during the winter. COPCs include EC and SAR.

- o APEC 3 – Historic presence of the Canada Pacific Railway. COPCs include metals, PHCs, BTEX, PAHs, Volatile Organic Compounds (VOCs), Polychlorinated Biphenyls (PCBs).
- o APEC 4 – Operation of a wastewater treatment facility. COPCs include sulphates, phosphate, nitrate, nitrite, metals.
- o APEC 5 – Listed as operating with gasoline and diesel storage tanks. COPCs include PHCs and BTEX.
- o APEC 6 – Listed as operating with fuel oil tanks. COPCs include PHCs and BTEX.

6.4.1 Discussion of Uncertainty

There were no material deviations to the APU requirements set out in O.Reg. 406/19 that would cause uncertainty or absence of information that would affect the validity of the APU Conceptual Site Model or the findings of this APU.

6.4.2 Compliance with Schedule D of O.Reg. 153/04

This APU generally addressed the requirements of Schedule D of O.Reg. 153/04 with necessary modifications based on the APU objectives and opinion of the QP.

7.0 CONCLUSIONS AND RECOMMENDATIONS

7.1 Conclusions

Based on the review of information collected during this APU, the Qualified Person concludes the following:

- There are six APECs within the Project Area that could result in the presence of contaminants in soil that is to be excavated within the Project Area.
- The Project Area land use is presently considered community. The first developed use of the Project Area is considered to be prior to 1896.
- Based on the identification of APECs, there is the likelihood that one or more contaminants have affected the soil that is to be excavated within the Project Area; and
- The COPCs that will be the focus of the Sampling and Analysis Plan (SAP) include: metals, hydride-forming metals, ORPs including EC, SAR, pH, B-HWS, CrVI, mercury and cyanide, PHCs, BTEX, PAHs, VOCs, sulphates, phosphate, nitrate, nitrite, and PCBs.

7.2 Recommendations

Based on the identification of APECs, it is recommended that a subsurface investigation be carried out to adequately characterize soil conditions in support of the proposed works to inform excess soils management planning. It is recommended that an environmental field investigation, supporting soil characterization within the Project Area, be undertaken in coordination with the already approved combined geotechnical and hydrogeological field investigation.

Given the volume of excess soil the Project is anticipated to generate and which requires off-Site management, the requirements of O.Reg. 406/19 and the Soil Rules will need to be addressed. Specific requirements that may be applicable, depending on project-specific details, include the preparation of additional excess soil planning documents (i.e., Sampling and Analysis Plan, Soil Characterization Report and Excess Soil Destination Assessment Report), registration of the Project on the excess soil registry, use of a tracking system during soil hauling, obtaining written agreement from the reuse Site, record keeping, etc. The need for these and other excess soil requirements should be confirmed as part of and/or prior to project design, tendering and construction.

8.0 LIMITATIONS AND USE OF REPORT

This report was prepared for the exclusive use of the Township of Bonnechere Valley and is based on data and information collected during the APU conducted by GEMTEC. This report may not be relied upon by any other person or entity without the express written consent of GEMTEC and the Township of Bonnechere Valley. In evaluating this Project Area, GEMTEC has relied in good faith on information provided by others. We accept no responsibility for any deficiencies or inaccuracies in this report as a result of omissions, misinterpretations, or fraudulent acts of others. GEMTEC disclaims any responsibility of consequential financial effects on transactions or property values, or requirements for follow-up actions and costs.

The scope and the period of GEMTEC's assessment are described in this Report, and are subject to restrictions, assumptions and limitations. Except as noted herein, the work was conducted in accordance with the scope of work and terms and conditions within GEMTEC's proposal. Distances noted in this report were determined using mapping data of variable accuracy and should therefore be considered approximate. GEMTEC did not perform a complete assessment of all possible conditions or circumstances that may exist at the Project Area referenced in the report. Conditions may therefore exist which were not detected given the limited nature of the assessment GEMTEC was retained to undertake with respect to the Project Area and additional environmental studies and actions may be required. In addition, it is recognized that the passage of time affects the information provided in the report. It is understood that the services provided for in the scope of work allowed GEMTEC to form no more than an opinion of the actual conditions at the Project Area at the time of the Site visit and cannot be used to assess the effect of any subsequent changes in any laws or regulations and the environmental quality of the Project Area or its surroundings. The conclusions provided herein represent the best judgment of GEMTEC based on current environmental standards. Due to the nature of the investigation and the limited data available, we cannot warrant against undiscovered environmental liabilities.

The scope of the APU is sufficient to identify areas of potential environmental concern that are obvious from visual examination of surface features and from available sources of information. This level of work is a method of risk reduction, not risk elimination. No building materials, water, liquid, gas, products or chemical sampling and/or testing on or in the vicinity of the Project Area

was carried out as part of this assessment. The APU does not include a program of intrusive observation/testing. These activities would be carried out as part of a soil characterization program. This assessment included only a cursory overview of the neighbouring land uses from public right of ways and from the Project Area and does not constitute a complete assessment of the adjacent Sites.

9.0 QUALIFIED PERSON DECLARATION

The Qualified Person (QP) responsible for this report makes the following declarations, as per O.Reg. 406/19:

- The Project Leader or operator of the Project Area have provided the QP or an individual supervised by the QP with the necessary information and access to the Project Area and authorized the QP or an individual supervised by the QP to make any inquiries of the Project Leader and operator's employees and agents, for the purpose of assisting the QP in preparing and/or overseeing the preparation of this document;
- The QP confirms that he/she was responsible for the preparation, oversight and/or review of this document; and,
- The QP confirms that the document is complete and accurate and meets the requirements of the regulation and the Soil Rules to the best of the QP's knowledge, subject to the limitations set out within our proposal and this report.

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Verisk's records relating to the described property (hereinafter referred to as the "Property"). Verisk makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Verisk's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Verisk does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Verisk disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Verisk Reports or from any tortious acts or omissions of Verisk's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

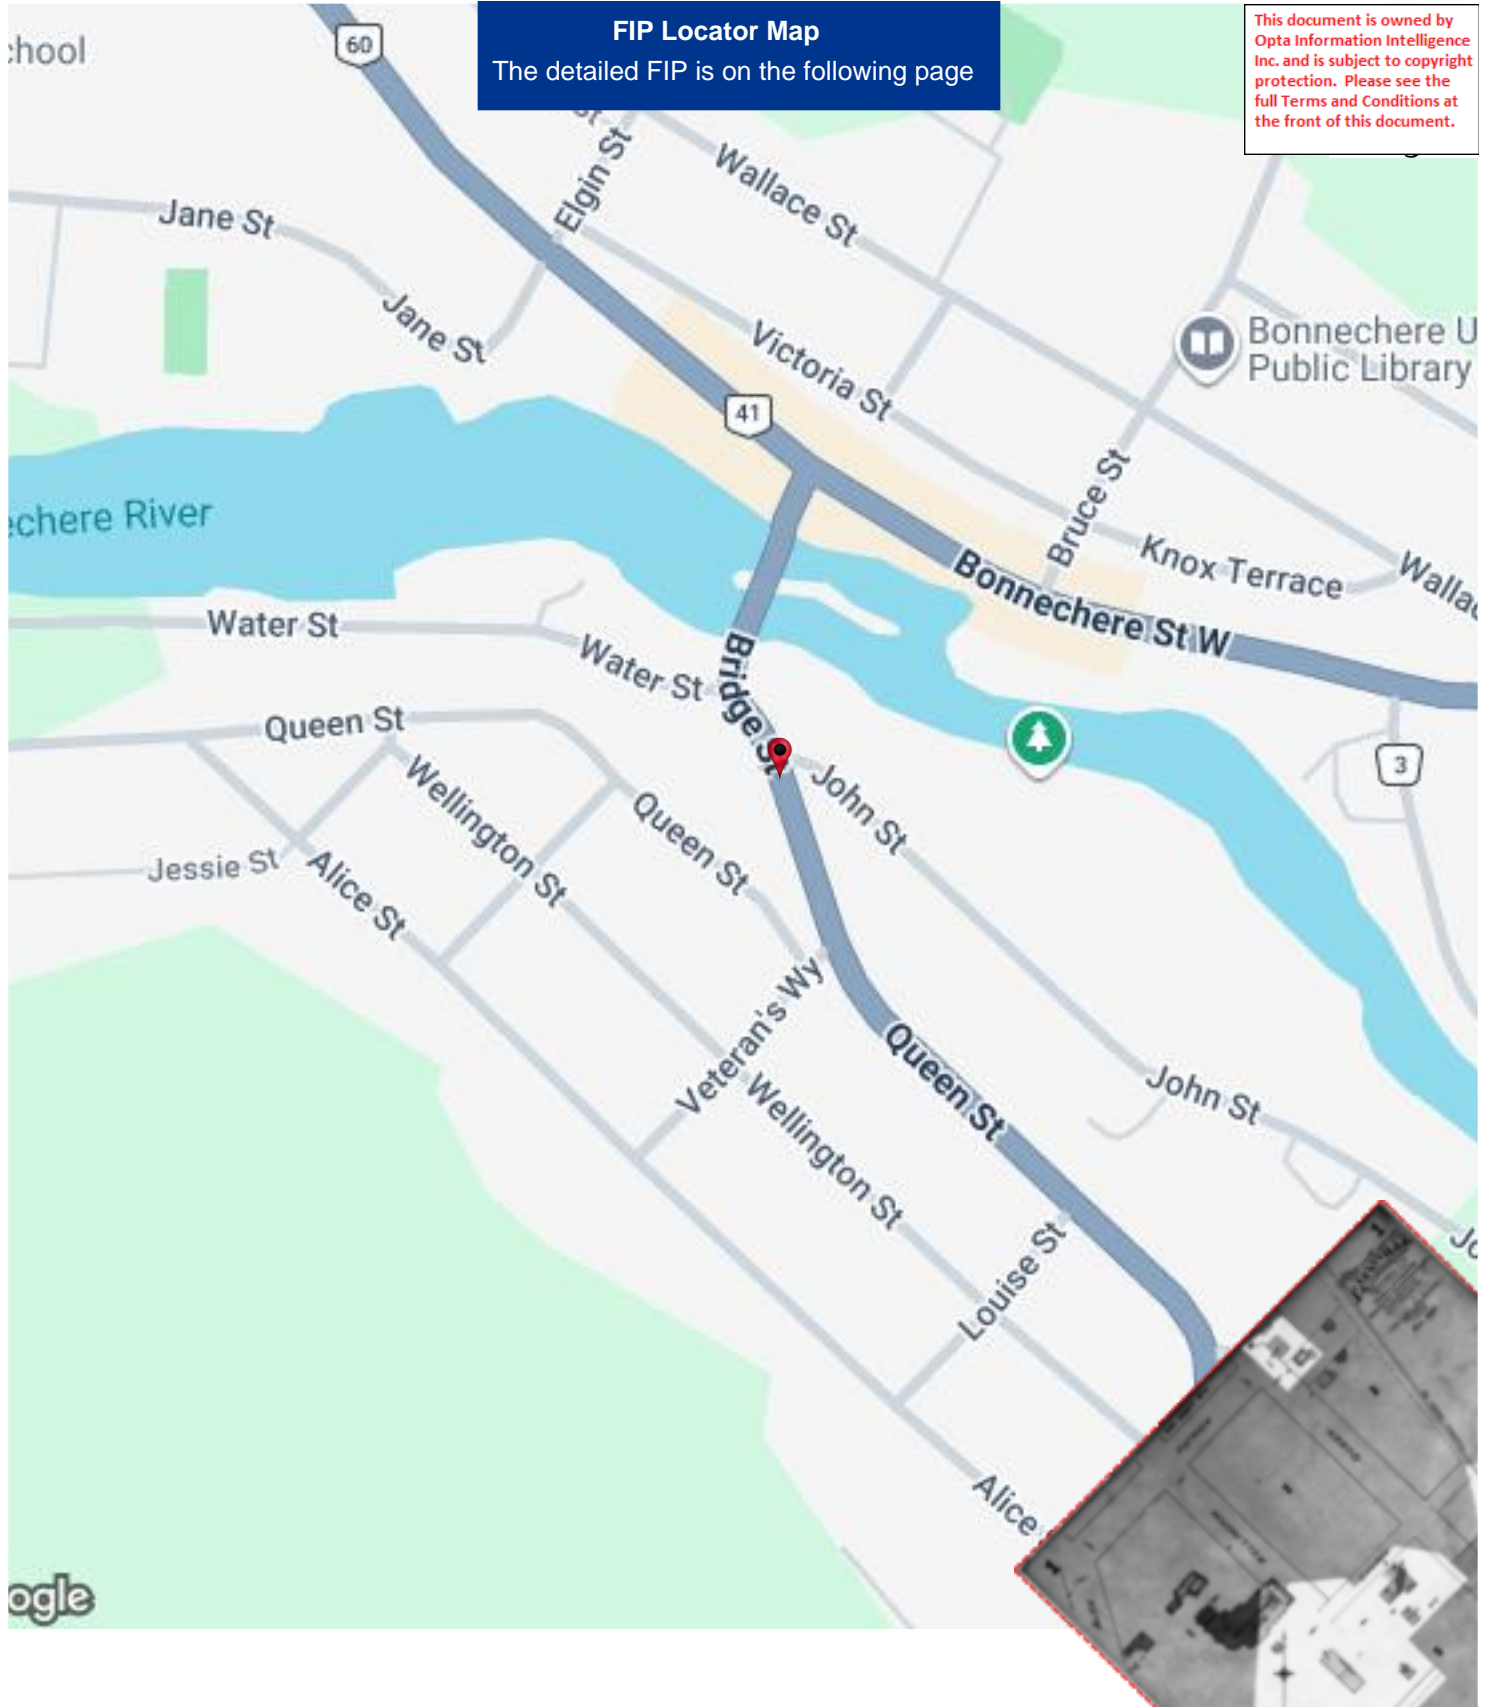

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

RE: CITY DIRECTORY RESEARCH
John Street, Eganville
Eganville, ON K0J 1T0

Thank you for contacting ERIS regarding our City Directory Search services. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. When searching a range of addresses, all civic addresses within that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on highly developed areas, while newly developed areas may be covered in the more recent years, older directories tend to cover only "central" parts of the city. To complete the search, we have either utilized the Toronto Reference Library, Library & Archives Canada and multiple digitized directories. While these do not claim to be a complete collection of all reverse listing city directories produced, ERIS has made every effort to provide accurate and complete information. ERIS shall not be held liable for missing, incomplete, or inaccurate information. If you believe there are additional addresses or streets that require searching, please contact us.

Search Criteria:

- ALL of Bridge St
- ALL of Fourth Chute Rd
- ALL of John St
- ALL of Louise St
- ALL of Melanie St
- ALL of Mill St
- ALL of Patrick St
- ALL of Queen St
- ALL of Wellington St

Search Notes:

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Site: David Joseph Tubby operating as Frontier Trails Camp
Highway 60 Eganville ON

Database:
CONV

File No:
Crown Brief No:
Court Location: Renfrew
Publication City:
Publication Title: Summer Camp Owner/Operator fined \$750 for Safe Drinking Water Act Violation
Act: SafeDrinkingWaterAct
Act(s):
First Matter:
Second Matter:
Investigation 1:
Investigation 2:
Penalty Imposed: David Joseph Tubby operating as Frontier Trails Camp was convicted of one violation under the SafeDrinkingWaterAct and was fined \$750 plus a victim fine surcharge of \$125 with 12 months to pay.

Location:
Region:
Ministry District:

Description: The conviction relates to failing to ensure that a record is made for every action taken by the operating authority relevant to the drinking water system's management (i.e. date, actions, results, treatments, operations and equipment maintenance).

Background: David Joseph Tubby owns/operates the Frontier Trails Camp, located on Highway 60 in Eganville. The camp operates for six to eight weeks each summer providing 50-60 children per week with horseback riding lessons and other outdoor activities. Drinking water is provided to camp visitors and residents from a well, which is treated using a point of entry treatment system at the main lodge. The system is categorized as non-municipal non-residential drinking water system under the Safe Drinking Water Act regulations. On July 25, 2017, ministry staff conducted an inspection of the system and observed that log entries for maintenance activities, operations, sampling and testing were not being recorded. The lack of records led to some samples not being taken. The same issues were noted in a previous inspection conducted in 2014, at which time Mr. Tubby was issued a warning. The ministry's Investigations and Enforcement Branch investigated and laid charges resulting in one conviction.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. **Note:** Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.

Abandoned Aggregate Inventory:

Provincial [AAGR](#)

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory:

Provincial [AGR](#)

This database of licensed and permitted pits and quarries is maintained by the Ontario Ministry of Natural Resources and Forestry (MNRF), as regulated under the Aggregate Resources Act, R.S.O. 1990. Aggregate site data has been divided into active and inactive sites. Active sites may be further subdivided into partial surrenders. In partial surrenders, defined areas of a site are inactive while the rest of the site remains active.

Government Publication Date: Up to Oct 2025

Abandoned Mine Information System:

Provincial [AMIS](#)

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-May 2025

Anderson's Waste Disposal Sites:

Private [ANDR](#)

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks:

Provincial [AST](#)

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies:

Private [AUWR](#)

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Apr 30, 2025

Borehole:

Provincial [BORE](#)

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval:

Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities:

Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2023

Commercial Fuel Oil Tanks:

Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.

Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Chemical Manufacturers and Distributors:

Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register:

Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Apr 30, 2025

Compressed Natural Gas Stations:

Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Nov 2025

Inventory of Coal Gasification Plants and Coal Tar Sites:

Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions:

Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Aug 2025

Certificates of Property Use:

Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Nov 30, 2025

Drill Hole Database:

Provincial

[DRL](#)

The Ontario Drill Hole Database (ODHD) is offered by the Province of Ontario's Ministry of Mines. The dataset contains information for over 164,000 percussion, overburden, sonic and diamond-drill holes. The presence of assay results with cutoff values for gold, silver, copper, zinc, lead, nickel and platinum group elements is noted. Drill hole data are compiled from assessment files that have been submitted to the ministry in accordance with the Ontario Mining Act (OMA). Source assessment file numbers are captured for cross reference with the Ontario Assessment File Database (OAFD). Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Jul 2025**Delisted Fuel Tanks:**

Provincial

[DTNK](#)

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: Oct 2023**Environmental Activity and Sector Registry:**

Provincial

[EASR](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011 - Nov 30, 2025**Environmental Registry:**

Provincial

[EBR](#)

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994 - Nov 30, 2025**Environmental Compliance Approval:**

Provincial

[ECA](#)

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011 - Nov 30, 2025**Environmental Effects Monitoring:**

Federal

[EEM](#)

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007***ERIS Historical Searches:**

Private

[EHS](#)

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Nov 30, 2025**Environmental Issues Inventory System:**

Federal

[EIIS](#)

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event:

Provincial **EMHE**

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Apr 30, 2022

Environmental Offenders Registry:

Federal **EOR**

The Environmental Offenders Registry, enforced by Environment and Climate Change Canada and Parks Canada, tracks corporations convicted under specific federal environmental laws. The registry includes corporate convictions resulting from court proceedings. Court prosecutions are one of several enforcement measures used when violations or potential violations are detected. Other measures like tickets, warning letters, or compliance orders may also be employed to restore compliance. Although not affected by the Environmental Enforcement Act, convictions obtained by Environment and Climate Change Canada under the Species at Risk Act and the Pollution Prevention Provisions of the Fisheries Act are also included.

Government Publication Date: Oct 31, 2025

Environmental Penalty Annual Report:

Provincial **EPAR**

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment, Conservation and Parks (MECP). These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2024

Excess Soil Registry:

Provincial **ESNR**

The Excess Soil Registry is made available by the Resource Productivity and Recovery Authority (RPPRA). Excess soil is soil dug up mainly during construction and excavation activities that must be removed from the development site because it cannot or will not be reused. The Minister of the Environment, Conservation and Parks directed the RPPRA to establish and maintain the Excess Soil Registry, enabling regulated parties to comply with registration and filing notice requirements, the ministry to access data, and the public to view information from those filings. From January 1, 2023, construction and development project leaders, as well as operators and owners of soil Reuse Sites, and Residential Development Soil Depot sites, must file notices detailing how excess soil is reused and disposed of in compliance with Ontario's Excess Soil Regulation.

Government Publication Date: Aug 31, 2025

List of Expired Fuels Safety Facilities:

Provincial **EXP**

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Federal Convictions:

Federal **FCON**

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land:

Federal **FCS**

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Oct 2025

Fisheries & Oceans Fuel Tanks:

Federal **FOFT**

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS):

Federal

FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: Oct 31, 2021

Fuel Storage Tank:

Provincial

FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.

Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Fuel Storage Tank - Historic:

Provincial

FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary:

Provincial

GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. As of January 1, 2023, businesses and institutions subject to the amended Reg. 347: General – Waste Management are required to report their activities and pay fees through Resource Productivity & Recovery Authority (RPRA) online Hazardous Waste Program Registry (HWPR) rather than the Hazardous Waste Information Network (HWIN) system previously operated by the Ministry of the Environment, Conservation and Parks (MECP). Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Mar 31, 2025

Greenhouse Gas Emissions from Large Facilities:

Federal

GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO₂ eq).

Government Publication Date: 2013-Feb 2025

TSSA Historic Incidents:

Provincial

HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Historical Business Activity Risk:

Federal

HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this list does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including BC Directories, Hendersons, Mights, Sun Directories, Vernons, and Wrights; spanning roughly 1920s through 1960 depending on information available by city.

This list is currently limited to sites as reported in the following provinces: Alberta, British Columbia, Saskatchewan, Manitoba, New Brunswick, Nova Scotia, Ontario, and Quebec.

Government Publication Date: 1920s - 1960

Indian & Northern Affairs Fuel Tanks:

Federal

IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks:

Provincial

INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing is a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: Oct 2023

Landfill Inventory Management Ontario:

Provincial

LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Mar 31, 2022

Canadian Mine Locations:

Private

MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences:

Provincial

MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Feb 2025

National Analysis of Trends in Emergencies System (NATES):

Federal

NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports:

Provincial

NCPL

The Ministry of the Environment Conservation and Parks (MECP) provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act. MECP publicly releases the Environmental Compliance Report (ECR) on the Ontario Data Catalogue. In Ontario, all facilities with regulated wastewater discharges or air emissions under the Ontario Water Resources Act and the Environmental Protection Act must monitor and report any cases where approved operating limits have been exceeded.

Government Publication Date: Dec 31, 2023

National Defense & Canadian Forces Fuel Tanks:

Federal

NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills:

Federal

NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Nov 2023

National Defence & Canadian Forces Waste Disposal Sites:

Federal

NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents:

Federal

NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Nov 30, 2025

National Energy Board Wells:

Federal

NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES):

Federal

NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

Notice of Contamination List:

Federal

NOC

This dataset contains Notice of Contamination (NOC) submissions reported to the Canada Energy Regulator (CER), including the most recent annual update information where applicable. Regulated companies are required to submit an NOC when contamination is identified or encountered during any phase of a facility's lifecycle and confirmed through analytical sampling, or when contamination resulting from an incident cannot be remediated within 12 weeks of being reported to the CER. Blank values in the Annual Update Year and annual update fields indicate that the site has achieved remediation closure, has been identified as third-party contamination, or was reported recently and does not yet require an annual update.

Government Publication Date: Nov, 2025

National PCB Inventory:

Federal

NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory:

Federal

NPR2

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of pollutant releases (to air, water and land), disposals, and transfers for recycling. The inventory, managed by Environment and Climate Change Canada, tracks over 300 substances. Under the authority of the Canadian Environmental Protection Act (CEPA), owners or operators of facilities that meet published reporting requirements are required to report to the NPRI.

Government Publication Date: Feb 2024

National Pollutant Release Inventory - Historic:

Federal

NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances. This data holds historic records; current records are found in NPR2.

Government Publication Date: 1993-May 2017

Oil and Gas Wells:

Private

OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Oct 31, 2025

Ontario Oil and Gas Wells:

Provincial

OOGW

In 1998, the Ministry of Natural Resources (MNR) handed over to the Ontario Oil, Gas and Salt Resources (OGSR) Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database includes well owner/operator, location, permit issue date, and well cap date, license number, status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provided for each well record.

Government Publication Date: 1800-May 2025

Inventory of PCB Storage Sites:

Provincial

OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders:

Provincial

ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994 - Nov 30, 2025

Canadian Pulp and Paper:

Private

PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks:

Federal

PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register:

Provincial

PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011 - Nov 30, 2025

Ontario PFAS Spills:

Provincial

PFAS

This specific list of spills includes those incidents where one or more of the listed contaminants are identified in the PFAS Structure List and/or PFAS Chemicals Without Explicit Structure List made available by the United States Environmental Protection Agency (US EPA), is originally sourced from the Ministry of the Environment, Conservation and Parks spills related data. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Jun 2024; Aug 2024; Oct-Nov 2024

NPRI Reporters - PFAS Substances:

Federal

[PFCH](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This listing of PFAS substance reporters includes those NPRI facilities that reported substances that are found in either: a) the Comprehensive Global Database of PFASs compiled by the Organisation for Economic Co-operation and Development (OECD), b) the US Environmental Protection Agency (US EPA) Master List of PFAS Substances, c) the US EPA list of PFAS chemicals without explicit structures, or d) the US EPA list of PFAS structures (encompassing the largest set of structures having sufficient levels of fluorination to potentially impart PFAS-type properties).

Government Publication Date: Feb 2024

Potential PFAS Handlers from NPRI:

Federal

[PFHA](#)

The National Pollutant Release Inventory (NPRI) is Canada's public inventory of releases, disposals, and transfers, tracking over 320 pollutants. Per- and polyfluoroalkyl substances (PFAS) are a group of over 4,700 human-made substances for which adverse environmental and health effects have been observed. This list of potential PFAS handlers includes those NPRI facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used, or released by the facility - these are facilities that potentially handle PFAS based on their industrial profile.

Government Publication Date: Feb 2024

Pipeline Incidents:

Provincial

[PINC](#)

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing is an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2021

Potential PFAS Handlers from EASR:

Provincial

[PPHA](#)

The Ontario Environmental Activity and Sector Registry (EASR), described in Ontario Regulation 245/11, allows businesses with less complex operations - and hence not requiring an Environmental Compliance Approval - to register their activities with the Ontario Ministry of the Environment, Conservation and Parks (MECP). This list of potential PFAS handlers includes those EASR facilities that reported business activity (NAICS code) included in the US Environmental Protection Agency (US EPA) list of Potential PFAS-Handling Industry Sectors, further described as operating in industry sectors where literature reviews indicate that PFAS may be handled and/or released. Inclusion of a facility in this listing does not indicate that PFAS are being manufactured, processed, used.

Government Publication Date: Jun 30, 2024

Private and Retail Fuel Storage Tanks:

Provincial

[PRT](#)

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water:

Provincial

[PTTW](#)

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Nov 30, 2025

Ontario Regulation 347 Waste Receivers Summary:

Provincial

[REC](#)

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2021

Record of Site Condition:

Provincial

[RSC](#)

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up. RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09). The Government of Ontario states that it is not responsible for the accuracy of the information in this Registry.

Government Publication Date: 1997-Sept 2001, Oct 2004 - 31 Dec, 2025

Retail Fuel Storage Tanks:

Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Apr 30, 2025

Scott's Manufacturing Directories:

Private SCT

Scott's Directories is a data bank containing information on various manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, applicable NAICS Codes, and product categories are included in this database.

Government Publication Date: 1992-Mar 2011; Feb 2025

Ontario Spills:

Provincial SPL

List of spills and incidents made available by the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Oct 2025

Wastewater Discharger Registration Database:

Provincial SRDS

Facilities that report either municipal treated wastewater effluent or industrial wastewater discharges under the Effluent Monitoring and Effluent Limits (EMEL) and Municipal/Industrial Strategy for Abatement Regulations. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment keeps record of direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation, Mining, Petroleum Refining, Organic Chemicals, Inorganic Chemicals, Pulp & Paper, Metal Casting, Iron & Steel, and Quarries.

Government Publication Date: 1990-Dec 31, 2023

Anderson's Storage Tanks:

Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks:

Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Apr 2024

Variances for Abandonment of Underground Storage Tanks:

Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.

Records are not verified for accuracy or completeness.

Government Publication Date: Feb 28, 2022

Waste Disposal Sites - MOE CA Inventory:

Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011 - Nov 30, 2025

Waste Disposal Sites - MOE 1991 Historical Approval Inventory:

Provincial [WDSH](#)

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Waste Management Site:

Provincial [WMS](#)

This data contains Waste Disposal Site types collected by the Ministry of Natural Resource (MNR). The new data class brings over data from the Waste Management Information System (WMIS), which is an MS Access based database used by MNR to track Waste Management Sites. This was married with the spatial data from Waste Disposal Sites where possible. Different Waste Disposal Site types collected by the Ministry of Natural Resources include: compost disposal, hazardous waste disposal, household waste disposal, industrial waste disposal, septic drying bed, septic field, sewage disposal, tile bed, and transfer station. The data is currently under development, meaning the data is currently in the process of being created by the MNR.

Government Publication Date: April 30, 2025

Water Well Information System:

Provincial [WWIS](#)

This database consists of information submitted by well contractors detailing locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table. The database is provided by the Ontario Ministry of Environment, Conservation and Parks.

Government Publication Date: Jul 31, 2025

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.
